

MICHAEL KEUHLN

Tri Cities, WA • github.com/mkeuhlen • m.keuhlen@proton.me • linkedin.com/in/michaelkeuhlen

TECHNICAL SKILLS

Vulnerability & Threat Management: Qualys VMDR, Nessus, Suricata IDS, pfBlockerNG (vulnerability scanning, alert triage, detection tuning, threat-intel and GeoIP feeds)

Security Frameworks & Compliance: NIST SP 800 series, PCI DSS, incident response planning, risk assessment

Networking: pfSense firewall configuration, network segmentation (VLANs), access control lists (ACLs)

Security Tools & Analysis: Wireshark, Nmap, Hashcat, packet and log analysis

Systems & Infrastructure: Windows 10/11 and Server 2016, Linux (CentOS), VMware, VirtualBox, secure endpoint configuration; Azure AD / Entra ID (familiarity)

Programming & Scripting: Python (coursework and projects) and SQL; foundational coursework in C++, Bash, and PowerShell

CERTIFICATIONS

Qualys Vulnerability Management, Detection, and Response (VMDR) Specialist • 2026

CompTIA Security+ (SY0-701) • 2026

CompTIA A+ (1101/1102) • 2024

FEMA/NIMS: ICS-100, ICS-200, IS-700, IS-800 • (2014 – 2020)

SECURITY PROJECTS & EXPERIENCE

BCES Cybersecurity Awareness Training – Capstone Project | Ongoing 04/2025–06/2026

Partnering with Benton County Emergency Services (BCES) to design and deliver cybersecurity awareness training specifically tailored to public safety answering point (PSAP) staff. Training addresses social engineering, phishing, and insider threats most likely to target 911 communications environments. Developed training content aligned to NIST and NENA best practices, and adapted to real 911 PSAP operational workflows. Delivered training to organizational staff in 4 classes over 2 days. Documented and examined security knowledge and attitudes of staff pre and post training to establish success metrics of training.

Home Lab Security Projects | 2023 - Ongoing

- Deployed pfSense hardware firewall and VLAN segmentation. Configured firewall rules and access control policies to enforce network isolation for guest network traffic, IoT devices, and other endpoint devices.
- Deployed Suricata IDS, reviewed and triaged alerts, and tuned detection rules to reduce false positives.
- Configured pfBlockerNG with commercial threat intelligence feeds and GeoIP filtering. Regularly reviewed blocked traffic logs to assess feed effectiveness and identify issues.

Academic Security Work – Columbia Basin College | 2022–2026

- Completed lab assignments in vulnerability scanning, event log analysis, and secure endpoint configuration using industry-standard tools and methodologies.
- Developed incident response plans, risk assessments, and security policies mapped to NIST and CIS Controls.
- Coursework included dedicated studies of cryptology, ethical hacking, penetration testing, wireless security, E-commerce security, Unix/Linux administration, and more.

RELEVANT PROFESSIONAL EXPERIENCE

Field Systems Technician (Tier 2 IT Support) | 08/2022 – 05/2025

H&R Block – Multi-State Region

- Three recurring 10-month contracts running August through May.
- Supported up to 23 offices as the primary on-site IT resource, troubleshooting hardware, software, and network incidents to maintain business continuity across a multi-state region.
- Deployed and maintained Windows Server 2016 and Windows 10/11 Enterprise systems and domain-connected endpoints.
- Collaborated with senior IT and vendor teams to escalate and resolve higher-level incidents requiring a coordinated response.
- Served as dispatch authorization team member, validating remote troubleshooting accuracy and completeness before authorizing field technician dispatches.

EDUCATION

Bachelor of Applied Science – Cybersecurity | 2026

Columbia Basin College – Pasco, WA

Associate of Applied Science – Cybersecurity | 2024

Columbia Basin College – Pasco, WA

ADDITIONAL EXPERIENCE – PUBLIC SAFETY & EMERGENCY RESPONSE

Eleven years across law enforcement, corrections, and emergency communications public safety roles that required high-pressure decision-making, strict protocol adherence, accurate documentation, efficient and professional verbal communication, and handling of sensitive information.

Emergency Communications Specialist — Aurora 911 | 10/2020 – 03/2022

Patrol Officer — Aurora Police Department | 02/2020 – 10/2020

Corrections Officer — Washington State DOC | 12/2013 – 02/2020

Emergency Medical Technician — Deer Park Ambulance | 04/2011 – 04/2013

AWARDS

Life Saving Award — City of Aurora | 2021

Eagle Scout — Boy Scouts of America | 2010
